

Obverse and Reverse Coin Photos Fixed

Nicholas, Thursday 09 August 2012 - 14:31:58

Quite a number of coin photos have been added to coinbrag over the last few years with the obverse and reverse coins in the wrong slots. I've created an editor tool so I can easily go in and swap the photos with a click.

I'll be loading a tool that all braggers will be able to use as well for fixing their own assuming they are aware of the mistakes.

Meanwhile I'm going through the site and fixing a lot of the existing errors. I noticed quite a few while identifying the new coin photos from the Aspencoins.com collection. Speaking of which, if you haven't checked it out yet you can [Help us identify](#) thousands of uncatalogued coins. I must say it's been fun doing a few almost every day. I've seen some really neat coins and definitely added a few of them to my want list.
