

Finishing the Maintenance

Nicholas, Friday 08 November 2013 - 17:49:37

Well we're now on the new server. There were some technical delays with the new server but it's working fine now. I haven't tested all of CoinBrag's features yet but I'll be doing that over the next day or two. Some things might not look 100% as they were right now but they should all be good by the end of this weekend.

I do apologize for the extended downtime of the site. I had not expected us to be down for a week. Luckily every coin, photo and post was saved.

UPDATE: It looks like at the moment it's not possible to add coins or prices to the site. I'll get this working ASAP stay tuned...
